Press release

L'atelier des archives is proud to present the three collections which recently joined the catalogue !

Footage from the **Eclair** production company : apart from silent fictions, Eclair also produced numerous documentaries - before 1921 - aiming to present remote lands and customs, in particular Belgian Congo. This is a unique testimony of what colonialism was. L'Atelier also acquired some of the newsreel Eclair produced between 1921 and 1927 (Eclair Journal)

Video footage from the photographer **Patrick Zachmann** : renowned photographer working for Magnum, Patrick Zachmann also shot video footage. On our database, you will thus find exclusive images of the Bataclan's attack, Notre Dame's great fire or migrants arriving in Lampedusa.

Video footage from the photographer **Jérôme Sessini** : the photographer Jérôme Sessini entrusted his video footage to us. They were shot in parallel to his photographic work on Maidan Plaza (2014), in the Donbass mines, on the mexican border, in Afghanistan with the american army and in the US where the opioid crisis is thriving.

Created in 2004,By Thierry Rolland L'Atelier des archives has since become a main player of the archive footage market in France
