## **UV&S Strengthens US Footprint to Support Global Exhibition Delivery**

**HUTCHINSON, KS** – UV&S Event Services is strengthening its US footprint with dedicated teams in Los Angeles and Boston, delivering a premium combination of creative excellence and dependable execution across major global Exhibitions & Trade Shows.

This marks a significant step in UV&S' continued international growth, enhancing its ability to support partners and clients across the full event lifecycle in key US markets. Drawing on experience supporting activations at major industry events including Licensing Expo, NAB, G2E and LA Screenings, this expanded US presence brings valuable local insight alongside proven international delivery. The result is a more accessible model for companies looking to execute confidently in the US.

For partners and brands managing complex builds across multiple regions, this means greater confidence in outcomes, fewer operational gaps, and a consistent standard from concept through to show floor.

UV&S continues to bring together creative and technical expertise across every stage of the process, including:

- Creative design and brand environments that capture attention and reflect brand intent
- Advanced visualization including CAD and 3D rendering for stakeholder alignment
- Integrated in-house production across fabrication, graphics, and finishing, reducing risk and increasing quality control
- Logistics, installation, and storage capabilities that support efficiencies across US and international markets
- Asset reuse and long-term storage solutions that maximize value across multiple events and regions
- Calm, accountable project leadership from planning through show week

This approach is designed for teams delivering high-stakes exhibitions where precision, speed, and consistency are critical, and where execution directly reflects on brand reputation. With teams now supporting projects across the US, UK, and international markets, UV&S is well positioned to support planning and delivery for 2026 exhibitions and activations.

If you're preparing for a major Exhibition/Trade Show, we welcome the opportunity to discuss how UV&S can elevate your presence, reduce risk, and deliver a high-quality event experience. Founded in 1959, Underground Vaults & Storage rebranded to UV&S to better reflect our expanded range of services beyond secure storage. With divisions specializing in IT solutions, digitization, and event services, UV&S supports clients worldwide. Our services include secure storage, records management, destruction, and recycling. The UV&S Technology division provides IT support, cybersecurity, and data center hosting. UV&S Event Services offers event and festival services, and R3Store Studios specializes in film digitization and restoration. UV&S Corporate operates from Hutchinson, KS, supporting multiple locations in the United States, the United Kingdom, and France. We are best known for our flagship salt mine facility in Hutchinson, where we store millions of items 650 feet underground for some of the largest companies in the world, including those in the motion picture and television industry.
